

iMARKETING CLUB

TOP 10 FREE TOOLS

for Affiliate Marketers

Everything you need to build a real
make-money-online business —
without spending a cent on software.

By Jay Salton · iMarketing Club

imarketingclub.com

· A PERSONAL NOTE FROM JAY ·

Look, I'm going to keep this short.

*"The best tool is the one you actually use.
The best price is free."*

When I started out, I wasted months paying for tools I didn't need, chasing software subscriptions, and convincing myself that I just needed one more thing before I was ready. Sound familiar?

The truth is that you can build a legitimate affiliate marketing business in the make-money-online niche with nothing but free tools.

This guide gives you the 10 free tools I'd use if I were starting from scratch today. No credit card required on any of them. Get these set up first. Then — and only then — upgrade the ones where paid features genuinely unlock something important.

That's the smart way to build. Let's get into it.

Jay Salton

YOUR CORE TOOLKIT STARTS HERE

Google Docs / Google Drive

CONTENT & WRITING

Free Forever

"Your entire content operation — for free."

Before you spend a cent on anything else, you need somewhere to write, store, and organise your content. Google Docs and Drive do this better than paid alternatives for most marketers. Write your blog posts, email sequences, affiliate reviews, and lead magnets all in one place — accessible from anywhere, automatically backed up, and shareable with collaborators instantly.

USE IT FOR:

Writing all content assets, storing resources, collaborating on campaigns.

→ drive.google.com

01

Mailchimp (Free Tier)

EMAIL MARKETING

Free up to 500 contacts

"Start building your list today. Not tomorrow."

Your email list is the only asset in digital marketing that you actually own. Social platforms come and go. Algorithms change. Your list stays. Mailchimp's free tier gives you up to 500 contacts and 1,000 sends per month — more than enough to get started, validate your niche, and start building relationships with your audience before ever spending a dollar on email software.

USE IT FOR:

Building and emailing your first subscriber list, welcome sequences, broadcast emails.

→ mailchimp.com

02

Canva (Free Plan)

DESIGN & GRAPHICS

Free Plan Available

"Professional graphics without a design degree."

Affiliate marketing lives and dies on attention. You need graphics for blog posts, social media, email headers, lead magnet covers, and promotional materials. Canva's free plan gives you access to thousands of templates and a dead-simple drag-and-drop editor that produces work that looks genuinely professional. The paid features are nice, but the free tier will take you a very long way.

USE IT FOR:

Lead magnet covers, social media graphics, email banners, blog post images.

→ canva.com

03

Google Analytics 4

TRACKING & ANALYTICS

Completely Free

"You can't improve what you don't measure."

If you're sending traffic anywhere — to a blog, a landing page, a bridge page — you need to know what's working. GA4 is completely free, integrates with everything, and gives you the data you need to make smart decisions about where to double down and what to cut. Install it on day one. Future you will be extremely grateful.

USE IT FOR:

Tracking page views, traffic sources, conversions, and audience behaviour.

→ analytics.google.com

04

TRAFFIC, WEBSITES, AND STAYING CONSISTENT

05

Ubersuggest (Free Tier)

SEO & KEYWORD RESEARCH

Free Searches Daily

"Find what people are actually searching for."

Before you write a word of content, you need to know if anyone is actually searching for what you're about to write. Ubersuggest's free tier gives you daily keyword searches, basic competitor analysis, and content ideas — enough to validate your niche and find low-competition keywords before you invest time creating content that nobody will ever find.

USE IT FOR:

Keyword research, competitor analysis, content ideas, niche validation.

→ neilpatel.com/ubersuggest

06

WordPress.com (Free) or Blogger

WEBSITE / BLOG PLATFORM

Free Hosted Option

"Your home base on the internet."

You need somewhere to publish content, host your affiliate reviews, and build your authority. WordPress.com's free plan and Blogger are both legitimate starting points that cost nothing. The free plans have limitations — you can't install custom plugins, for example — but they're completely functional for content publishing while you're getting started and testing whether your niche has traction.

USE IT FOR:

Publishing blog posts, affiliate reviews, and building organic traffic.

→ wordpress.com

07

Buffer (Free Plan)

SOCIAL MEDIA

3 Channels Free

"Schedule your social content once, post everywhere."

Consistency is the game in social media — and consistency is hard when you're doing everything yourself. Buffer's free plan lets you connect up to 3 social channels and schedule 10 posts per channel. That's enough to stay active on Facebook, Instagram, and Twitter simultaneously without being chained to your phone posting manually every day.

USE IT FOR:

Scheduling social media posts across platforms, maintaining content consistency.

→ buffer.com

THE FINISHING TOUCHES THAT TIE IT ALL TOGETHER

08

Pretty Links (Free Plugin)

LINK MANAGEMENT

Free Plugin

"Clean, trackable affiliate links — instantly."

Long, ugly affiliate links kill trust. Nobody clicks on a URL that looks like a string of random characters. Pretty Links turns those into clean, branded links like `yoursite.com/recommends/tool-name` — and tracks every click. The free version does everything you need when starting out: cloaking, redirection, and basic click analytics.

USE IT FOR:

Cloaking affiliate links, tracking clicks, creating clean branded URLs.

→ prettylinks.com

09

ChatGPT (Free Tier)

AI WRITING ASSISTANT

Free Account Available

"Your always-on writing partner."

Content is the engine of affiliate marketing, and ChatGPT's free tier is one of the most powerful writing tools available at zero cost. Use it to brainstorm article ideas, outline blog posts, draft email subject lines, polish your copy, and research topics faster than you could manually. Important: always edit AI output and add your own voice. The raw output is a starting point, not a finished product.

USE IT FOR:

Content outlines, email drafts, headline ideas, research summaries, copy editing.

→ chat.openai.com

10

Wealthy Affiliate (Free Starter)

TRAINING & COMMUNITY

Free Starter Account

"The training and community I'd start with."

Wealthy Affiliate's free starter account gives you access to the core training, community, and website builder — enough to understand the fundamentals of affiliate marketing and get your first site live. It's one of the most complete free introductions to the business model available anywhere. The premium upgrade is worth it when you're ready to go deeper, but the free account alone is genuinely valuable.

USE IT FOR:

Learning affiliate marketing fundamentals, building your first site, community support.

→ wealthyaffiliate.com

WHAT'S NEXT?

You've Got The Tools.

Now Build The Funnel.

These 10 free tools will get you started. But there's one piece of the puzzle that most beginners spend months trying to build from scratch — and you don't have to.

RECOMMENDED NEXT STEP

PLR Funnels — Done-For-You System
